## Seminari Generali IAC 2024

### AVVISO DI SEMINARIO

<b>Luogo</b>	Area di Ricerca Napoli1 Via Pietro Castellino, 111, Napoli Aula Conferenze Vaccaro
<b>Data e ora</b>	Martedì 3 dicembre 2024 ore 14.30
<b>Speaker</b>	Francesco Solombrino – Università degli Studi di Napoli «Federico II»
<b>Titolo</b>	A fractional approach to strain-gradient plasticity: beyond core-radius of discrete dislocations
<b>Abstract</b>	<p><i>In this talk we derive a strain-gradient theory for plasticity as the <math>\Gamma</math>-limit of discrete dislocation fractional energies, without the introduction of a core-radius. By using the finite horizon fractional gradient introduced by Bellido, Cueto, and Mora-Corral of 2023, we consider a nonlocal model of semi-discrete dislocations, in which the stored elastic energy is computed via the fractional gradient of order <math>1 - \alpha</math>. As <math>\alpha</math> goes to 0, we show that suitably rescaled energies <math>\Gamma</math>-converge to the macroscopic strain-gradient model of Garroni, Leoni, and Ponsiglione of 2010.</i></p>
